

IDEATION PHASE

Electric Vehicle Analytics Dashboard using Flask & Tableau

Project Information

Project	Electric Vehicle Analytics Dashboard
Website	E-CarStart
Tech	Flask, Tableau Public, Bootstrap
Dataset	Electric Vehicle Registration Dataset
Prepared By	_____

Introduction

This document records the ideation process for selecting the Electric Vehicle Analytics Dashboard project.

Brainstorm & Idea Prioritization

Potential ideas included EV registrations, charging infrastructure, manufacturer comparison, incentives and vehicle categories. The EV Analytics Dashboard was selected due to high feasibility and impact.

Problem Statement

Provide a centralized interactive platform to analyze EV trends in India.

Empathy Map

Users need simple visual insights instead of raw datasets.

Selected Solution

Build a Flask website that embeds Tableau dashboards and stories.

Expected Outcomes

Interactive analytics, improved accessibility and data-driven insights.

Conclusion

The selected solution aligns with project goals and available datasets.
